MOBILE & DATA-SYSTEMS SOFTWARE CONSULTANT

Ashly Tafadzwa Dhani

Software Consultant | Mobile & Full-Stack Developer | Project Manager

Award-winning Software Project Manager and Full-Stack Developer with 7+ years designing, building, and deploying mobile and web platforms across the enterprise, fintech, government, and development sectors. Specialises in offline-capable mobile applications, structured data-collection systems, and dashboards for monitoring, reporting, and decision-making, delivering end to end from architecture and field testing through training and handover.

Consultancy Value Proposition

Delivers field-ready digital tools that combine hands-on mobile and full-stack engineering with disciplined project governance: offline-first data capture with geo-tagging and media, secure role-based data systems, and analytics dashboards with alerts and exportable reports. Experienced across the full lifecycle: requirements gathering, user testing with real communities, technical documentation, training, deployment, and sustainable maintenance and handover.

PROFESSIONAL EXPERIENCE

Department Lead / Head

2026 - Present

Webdev Private Limited | webdev.co.zw

- Head the software development department, reporting directly to the Managing Director and owning strategy, delivery standards, and capacity across the engineering function.
- Set technical direction and governance for enterprise software, fintech integrations, and digital transformation programmes for banking, government, and private sector clients.
- Lead departmental planning, resourcing, hiring, mentorship, and performance management while aligning delivery outcomes with executive business goals.

Project Manager

2025 - 2026

Webdev Private Limited | webdev.co.zw

- Managed high-value software projects end to end across banking, government, fintech, hospitality, and enterprise sectors, coordinating multidisciplinary delivery teams.
- Owned project governance, stakeholder communication, sprint planning, resource coordination, QA processes, budgeting inputs, and strategic delivery reporting.
- Drove Agile and Scrum practices that improved delivery visibility, operational efficiency, technical quality, and cross-team accountability.

Senior Full Stack Developer

2024 - 2025

Webdev Private Limited | webdev.co.zw | paynow.co.zw | property.co.zw

- Delivered scalable full-stack web platforms, APIs, and enterprise systems using Laravel, React, Node.js, PostgreSQL, and modern JavaScript technologies.
- Designed secure backend architectures and responsive frontends while integrating payment gateways, analytics systems, and third-party enterprise tools.
- Contributed to sprint execution, code reviews, deployment workflows, troubleshooting, and software quality assurance across multiple high-value projects.

Web Developer

2023 - 2024

Webdev Private Limited

- Built and maintained responsive websites and custom business applications for corporate, hospitality, financial, and institutional sector clients.
- Assisted in debugging, testing, optimization, and deployment activities that improved platform stability and client delivery efficiency.

PROFESSIONAL EXPERIENCE

Software Developer

Intertrix Solutions Pvt Ltd

2022 - 2023

- Developed and maintained software applications, business systems, and database-driven platforms tailored for local enterprise and SME operational requirements.
- Participated in backend development, frontend implementation, debugging, and technical support using modern web technologies and relational databases.
- Collaborated with senior developers and project stakeholders to translate client requirements into scalable and user-friendly software solutions.
- Assisted with deployment processes, troubleshooting activities, system maintenance, and continuous improvement initiatives across client environments.

Software Developer

Codeex Technologies | Harare, Zimbabwe

2021

- Developed Java, PHP, and MySQL applications supporting business automation, operational efficiency, and digital service delivery initiatives.
- Assisted in application testing, troubleshooting, maintenance, and optimization activities to improve software performance and system reliability.
- Supported mobile application lifecycle activities including implementation, updates, debugging, and user support across multiple internal projects.
- Worked collaboratively with technical teams to deliver functional software solutions aligned with client specifications and operational requirements.

E-Commerce Specialist

Alibaba Group Holding Limited | China

2019 - 2021

- Customized eCommerce systems and digital solutions supporting international business operations, online transactions, and platform scalability initiatives.
- Implemented secure payment integrations, inventory workflows, SEO strategies, and analytics-driven optimization processes for digital commerce environments.
- Collaborated with multicultural technical teams to improve customer experience, operational efficiency, and performance across online business platforms.
- Contributed to platform enhancement initiatives, technical documentation, troubleshooting processes, and digital growth support activities.

Digital Solutions Consultant

Freelance / Rowland | rowland.co.zw | Upwork | Jobvine

2017 - Present

- Delivered websites, software systems, mobile applications, branding solutions, and digital marketing services for startups, SMEs, and private clients.
- Managed complete project lifecycles including discovery sessions, solution design, development, deployment, optimization, and post-launch support.
- Provided UI/UX design, SEO, analytics implementation, and digital strategy consulting focused on improving visibility, engagement, and business growth.
- Built long-term client relationships through consistent delivery quality, technical advisory services, and responsive project execution practices.

Computer Lab Teacher

DZ Number 5 Government Primary School

2015 - 2016

- Taught foundational computer literacy, digital skills, and basic software usage to primary school students within the school computer laboratory environment.
- Assisted students in developing practical understanding of typing, internet usage, productivity tools, and introductory ICT concepts.
- Maintained laboratory equipment, coordinated classroom technology usage, and supported administrative technology-related activities when required.
- Encouraged digital learning adoption and improved student confidence in computer usage through structured practical training sessions.

ENTREPRENEURSHIP & BUSINESS LEADERSHIP

Founder

2025 - Present

Semita Core Pvt Ltd | Corporate Branding Division & Semitech Systems Division

- Founded and oversee a diversified business focused on corporate branding, digital systems, technology services, and enterprise support solutions.
- Lead business strategy, client acquisition, supplier coordination, operational planning, and brand positioning across multiple service divisions.
- Manage digital solution initiatives including software systems, branding services, web platforms, and technology-driven business transformation projects.
- Drive organizational growth through innovation, relationship management, service quality improvement, and market expansion initiatives.

PROFESSIONAL VALUE

Mobile & Offline Delivery

Builds offline-capable mobile applications for basic smartphones with structured forms, geo-tagging, timestamping, photo/video capture, and reliable data synchronisation.

Data & Reporting Systems

Designs secure, access-controlled data systems and analytics dashboards for trend analysis, alerts, and exportable reports that turn field data into decisions.

Field Delivery & Training

Runs the full consultancy lifecycle: requirements gathering, user testing with communities, technical documentation, training, deployment, and maintenance handover.

Project Governance

Combines project governance, stakeholder communication, Agile delivery, and clear reporting to move complex work from inception through to a sustainable handover.

CAREER POSITIONING

Well suited to consultancy engagements requiring end-to-end delivery of mobile and web data systems, including offline-capable data-collection applications, monitoring & evaluation (M&E) tools, secure dashboards and reporting platforms, and community-facing digital solutions delivered with user testing, training, and sustainable handover.
